

Position: Full Stack Developer

You're a full stack developer with a passion for solving tough problems with performant code. You love to deploy new code, and want to be part of a team that does so regularly.

We're an online financial planning company with the first solution of its kind in the world. Our environment is energetic and collaborative with competitive pay and benefits. Plus you get to work on making a real difference in people's lives.

What You'll Do:

- Writing well-tested, understandable code
- Collaborating with other people to provide the best experience to clients (internal & external)
- Helping Canadians reach financial freedom by building world-class financial planning products
- Fixing bugs fast and taking your time to solve hard problems well
- Contributing back to the open source community
- Learning and growing constantly to feed your passion for self-improvement and making those around you better

You'll need to have 5+ years of extensive experience with:

- Building backend web services in Elixir/Absinthe
- Working with relational databases and SQL (Postgres)
- Building and scaling user-focused web applications (React/Relay)

You Might Also Have:

- Have a history of contributing to our community through code, documentation, mentoring, teaching, speaking, or organizing
- Personal finance/financial planning experience
- Experience with development on a leading cloud provider (GCE, AWS, Azure, etc.)
- A commitment and drive for quality, excellence and results
- Passion for growing development teams and making others feel better about their money

We Have:

- Competitive salary and compensation structure, including options
- Beautiful, open-concept working environment conveniently situated in downtown Toronto
- Generous group benefits package
- Company events and frequent office lunches
- A team of smart collaborators and an open mind for new ideas

Please send a cover letter and resumé to careers@planswell.com with subject line "**Software Developer - {YOUR NAME}**".
